A Conference of the Association for the Advancement of Sustainability in Higher Education

## The Role of Higher Education in Creating a Sustainable World

Welcome to Arizona State University and the Association for the Advancement of Sustainability in Higher Education's inaugural conference, AASHE 2006: The Role of Higher Education in Creating a Sustainable World. We are honored to have been selected to host this extraordinary event.

As ASU moves forward in implementing its University-Wide Sustainability Initiative and building the Global Institute of Sustainability, we are placing an emphasis on vigorously engaging the intellectual energies of our entire university. ASU is building an environment where we can be organized as a university around the central theme of sustainability. In September, we gathered to assess our progress in this task. A number of efforts throughout research, teaching and operations indicated that momentum is building. However, I would argue that the challenges we are facing continue to move faster than the university-wide efforts of ASU or the collective efforts of our global community are confronting them.

Like ASU, AASHE recognizes the need to pursue an integrative approach to sustainability. This inaugural event marks the expansion of efforts to coordinate around issues of sustainability in higher education at a national level and the beginning of a new trajectory for ASU. AASHE's embrace of NGOs, government agencies, and businesses as critical partners in the effort to advance sustainability reflects the type of collaborative approach that ASU is committed to.

AASHE 2006 will provide all of the attendees a chance to conduct an intellectual exchange that could catalyze a new approach to the issue of sustainability. We hope that you enjoy your time at our campus and the conference. Even more importantly, we hope that you arrive with the sense of urgency our current situation demands and leave stimulated to achieve the cultural transformation necessary for higher education to lead the way in achieving a sustainable society.

Michael M. Crow  
President  
Arizona State University

Welcome!

We are pleased to welcome you to ASU's campus for the inaugural North American conference of the Association for the Advancement of Sustainability in Higher Education (AASHE).

AASHE 2006 offers an exciting and unique opportunity for every sector of higher education to come together to demonstrate how colleges and universities can lead the way to a sustainable future. Whether you are a student or administrator, faculty or staff, community or business member, your participation in this inspiring event is appreciated. While at ASU, please take time to visit the Global Institute for Sustainability, the Decision Theater, The Biodesign Institute, the Interdisciplinary Science and Technology Building, and many of the other wonderful and innovative units dedicated to sustainability.

James Buizer  
Conference Co-Chair  
Arizona State University

Anthony Cortese  
Conference Co-Chair  
Second Nature, Inc

The Association for the Advancement of Sustainability in Higher Education thanks you for attending its inaugural conference. We are thrilled to see the sustainability movement in higher education growing in leaps and bounds, as there is much urgent and important work to be done. Over 650 people have registered for AASHE 2006, in addition to more than 100 exhibitors and volunteers, making this the largest campus sustainability gathering in North America to date.

The conference showcases the depth and range of sustainability initiatives at colleges and universities in North America. Every sector of higher education is represented, from students to upper level administrators to professional association staff, as well as businesses, NGOs and government agencies interested in sustainability in higher education.

I encourage you to attend sessions outside your usual range of interest. With over 230 different presentations, from papers and field reports to panels, roundtables, workshops and posters, the choices are many. Special thanks to the review committee, which worked to select presentations that reach beyond “sustainability 101.”

I hope this conference inspires, reinvigorates, instructs, and supports your work on campus, and that you connect with colleagues and make many new friends. Thank you for your part in working to create a sustainable world, and enjoy the meeting!

Judy Walton  
Executive Director, AASHE

Welcome to AASHE 2006. We are excited to have you here and hope you enjoy the conference. The Local Logistics Committee consists of a multi-partnership from Facilities Management, University Business Services, Global Institute of Sustainability, and the Office of Sustainability Initiatives. This group has given a Yeoman's effort working very hard to make this event a success; it would not have been possible without them and the extensive support from their departments. Sustainable practices have been demonstrated in the planning and execution of the conference, but one of the best outcomes has been in the longer terms impact for the ASU. As a result of this conference we are expanding our already extensive sustainability practices on campus, developing new ideas ranging from the materials used in our buildings, to the products and practices in our daily operations and food services. This component is a critical piece to the University-wide Sustainability Initiative at ASU. Thank you for this opportunity.

Have fun and enjoy your visit to ASU.

## Keynote Speakers

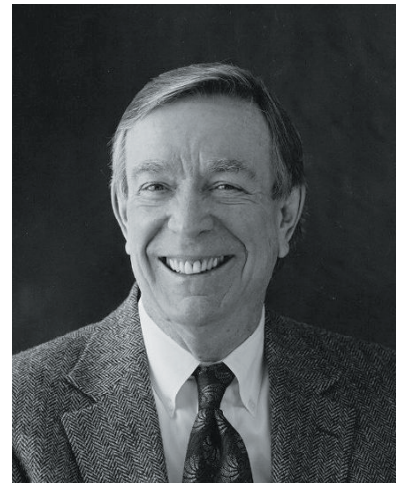

### Bill McKibben

McKibben is a visiting scholar in environmental studies at Middlebury College, and the author of *The End of Nature*, (1989) which sounded one of the earliest alarms about global warming. His six other books include *Hope, Human and Wild*, *Long Distance*, and *Maybe One* which took on the most controversial of environmental problems, population. A former staff writer for *The New Yorker*, his work appears regularly in *The Atlantic*, *The New York Review of Books*, *The New York Times*, *Harpers*, *Outside*, and many other national publications. McKibben continues to question society's path and advocates for simplifying our everyday lives and recovering the things that really matter. Prior to his arrival at Middlebury, he was a fellow at the Harvard University Center for the Study of Values in Public Life. He is the recipient of Guggenheim and Lyndhurst fellowships, and the winner of the 2000 Lannan Prize in Nonfiction Writing. McKibben holds honorary doctorates from several institutions and received a Bicentennial medal from Middlebury College in 2000. He lives with his wife and daughter in the Adirondack Mountains of New York.

### Ray Anderson

Anderson is chairman of Interface, Inc., the world's largest producer of commercial floor coverings, whose modular carpet tiles helped revolutionize the modern office. He founded the company in Atlanta in 1973 and has turned Interface into an environmentally friendly enterprise, reducing its environmental footprint by one-third. His book *Mid-Course Correction: Toward a Sustainable Enterprise: The Interface Model*, helped prove to other businesses that they could protect the environment while increasing profits. Today, Anderson is recognized as one of the world's most environmentally progressive chief executives, having served as co-chair of the President's Council on Sustainable Development during the Clinton administration and having been recognized by Mikhail Gorbachev with a Millennium Award from Global Green in 1996. His honors also include the prestigious Mitchell International Prize for Sustainable Development (2001); SAM-SPG Sustainability Leadership Award (2001); U.S. Green Building Council's Inaugural Leadership Award (2002); and National Wildlife Federation's Conservation Achievement Award for Corporate Leadership (2002). He was recently named a Senior Fellow and Leading Voice for Green and Sustainable Design by the Design Futures Council. An honors graduate of Georgia Institute of Technology, he holds honorary doctorates from Northland College, LaGrange College, and N.C. State University.

## Keynote Speakers

### Beverly Wright

Wright is a sociologist and leading scholar on environmental and economic justice and public policy. She is the founder and director of the Deep South Center for Environmental Justice, one of the few community/university partnerships that address environmental and health inequities in the Lower Mississippi River Industrial Corridor, commonly referred to as “cancer alley.” Wright has conducted groundbreaking research in the area of environmental justice and has developed an environmental-justice curriculum for use at the elementary-school level. She has directed numerous grassroots, community-initiated health surveys, evaluated community buyouts, and supervised community development initiatives around contaminated sites. She has served on the National Environmental Justice Advisory Council, chaired the Second National People of Color Leadership Summit, and co-chairs the Environmental Justice Climate Change Initiative.

### Hunter Lovins

Lovins is president of Natural Capitalism, Inc. ([www.natcapinc.com](http://www.natcapinc.com)). She holds a JD and several honorary doctorates, and has taught at numerous universities including Dartmouth College and the Universities of California and Colorado. Currently a professor of business at Presidio World College, Lovins has founded and grown several businesses and co-founded the Rocky Mountain Institute, where she served for 20 years as CEO. She has lectured extensively in over 15 countries, including at the World Economic Forum at Davos, The International Symposium on Sustainable Development in Shanghai, and the World Summit on Sustainable Development. She has consulted for industries and governments worldwide, as well as such multinational companies. She has also worked with community groups, local economic-development agencies and municipal governments. Lovins shared a 1982 Mitchell Prize, a 1983 Right Livelihood Award (often called the “alternative Nobel Prize”), the 1993 Nissan Prize, and the 1999 Lindbergh Award. In 2000 she was named *Time Magazine* Hero of the Planet. She has co-authored nine books, including *Natural Capitalism* (1999), and hundreds of papers, including briefings for Presidents Clinton and Bush and British Prime Minister Tony Blair. She is currently working in Afghanistan on a variety of projects, including the Afghan Cluster Competitiveness Project.

An Integrated Approach to Academics,  
Resource Planning, and Facilities**

**October 14 Workshop**  
**At the InterContinental Kansas City at the Plaza**

The need for increasing sustainability has never been greater. Colleges and universities can lead the way, but it's not always clear how best to do that. Join colleagues and top experts to learn how you can help empower your campus to successfully integrate sustainable practices.

What you will gain:

- An enhanced understanding of how to bridge the gaps across existing initiatives.
- Best practices for bringing integrated planning to campus sustainability efforts.
- Techniques for engaging others in sustainability.

on the Continuum of  
Integrated Sustainability Planning?**

**October 25 Webcast**

This no-travel webcast will share comprehensive case studies about how the following campuses are integrating sustainability in operations, policy, resource planning, and curriculum:

- **Arizona State University**
- **Grand Valley State University**
- **Harvard University**
- **Pima Community College**

Many campuses make the most of this event by inviting people from all departments, and disciplines, even from across the campus edge, to share in poster sessions, demonstrations, and pre- or post-webcast panels. They make Campus Sustainability Day a major celebration on their campuses. Purchase one license to share the webcast in your auditorium.

## GLOBAL INSTITUTE of SUSTAINABILITY

ARIZONA STATE UNIVERSITY

The Global Institute of Sustainability sparks interdisciplinary research on environmental, economic, and social sustainability. The Institute brings together life, earth, and social scientists, engineers, and government and industry leaders to share knowledge and develop adaptive solutions for an urbanizing world.

In 2007, our new School of Sustainability will begin educating a new generation of leaders to address the environmental, economic, and social challenges of the 21<sup>st</sup> century through collaborative learning, interdisciplinary approaches, and problem-oriented training. The School will offer bachelor's, master's, and doctoral degrees in sustainability.

# Greening The Conference

AASHE and ASU have taken measures to promote green practices at the AASHE 2006 conference. Environmentally responsible practices have been incorporated in planning and implementing conference materials, lodging, transportation, food services, and waste management. Not only do these greening efforts minimize the environmental impact of the conference, but they provide leadership and guidance for ASU and other universities, institutions, and individuals as they move toward a more sustainable future.

## **Conference Materials**

- All conference materials, including the program, are printed on 30% post-consumer recycled paper.
- Signs and displays for the Sustainability Expo are being reused from previous events whenever possible. New signs are being created so that they may be reused at future events.

## **Lodging**

- Conference hotels were selected on the basis of their proximity to the ASU campus. All hotels are within easy walking distance of the conference, local events, and attractions.
- Each conference hotel participates in environmentally responsible programs, e.g., of which reusing of linens and towels instead of daily laundering, recycling hotel waste materials, using of energy- and water-conserving fixtures, and minimizing of disposable toiletries in guest rooms.

## **Transportation**

- All conference participants are being encouraged to use public transportation, walk, or bike between conference events and hotels. Public transportation options include the Tempe FLASH service and the municipal bus system.
- The ASU Bike Co-op program will have 10-20 bicycles available free-of-charge to attendees.

## **Climate Neutral Conference**

- All greenhouse gas emissions generated by conference activities are being offset through generous donations by Sterling Planet, Climate Trust, and The Conservation Fund. These offsets include Renewable Energy Credits (RECs) equal to 50 tons of carbon donated by Sterling Planet to offset electricity used at the conference, and 100 tons of carbon offsets from Climate Trust and 225 tons from The Conservation Fund to offset CO<sub>2</sub> emission used by conference participants in getting to and from the conference.

## **Food Service**

- Attendees are encouraged to bring their own water bottles and coffee mugs to minimize the use of disposable items.
- Where possible, disposable items used during coffee breaks are created from recycled materials.
- All food preparation waste from the dinner and awards ceremony will be composted by a local composting company.

## **Waste Management**

- Recycling bins will be available throughout the conference, expo and student fair.
- All recyclable material from the conference will be recycled by the City of Tempe.

## Thanks AASHE Members!

AASHE members include campuses from Canada and the U.S. that are working to advance sustainability. In addition, businesses and NGOs participate as partner members. Dues support core operations, enabling AASHE to provide a wide range of services and resources to better serve our membership. We thank our members for their support.
