I am incredibly pleased to have you here with us at the 2012 edition of the AASHE conference. As you probably know, this is the biggest campus sustainability conference in North America, and in my experience the best way to get an idea of the breadth of exciting initiatives ongoing at our campuses. The Conference Steering Committee has taken your feedback from previous years into account in planning, programming and logistics so that we could provide you with the best possible experience while at an extremely competitive price.

We want you to go home inspired, with new or different tools in your pocket that could help you hit the ground running once you get back to the office, and with new connections with people who could help you on your way (and vice versa). I am positive that you will have an amazing time: if you do (or if you don’t), I strongly encourage you to get in touch with us with your feedback on how we could potentially make your conference experience better. Remember: this conference is programmed by campus sustainability people, for campus sustainability people, and together we can foster and strengthen the collaborative relationships that propel us forward towards sustainable campuses, and a more sustainable world for all. Have a wonderful, productive conference!

In designing this year’s program and conference theme, “Investing in the Future,” we drew heavily on feedback from attendees of past AASHE conferences and a series of rich discussions about the importance of, in the words of Oscar Romero, “taking the long view.” As members of the higher education community, we work to invest in our campuses and communities through the lens of economics, and consider what it means and requires to invest in our future. The Steering Committee wanted to challenge ourselves and you to consider the barriers, opportunities, and solutions at our campuses and communities through the lens of economics, and consider what it means and requires to invest in our future. I hope the program, form, and energy of this year’s conference allow you to put aside your daily challenges, connect with your peers, learn about the innovative work we are all doing, and inspire you to “take the long view.”

Welcome to California State University, Northridge, where I am honored to serve as president.

Cal State Northridge—the academic and economic leader of the San Fernando Valley—has a long history of investment in sustainable infrastructure and practices.

In 2007 it became one of the only institutions in the world with a grid-connected fuel cell plant. The 1 megawatt plant generates up to 15 percent of the total campus electricity, emitting only 70 percent of the CO2 of conventional power generation. Its waste heat is captured for campus heating and its greenhouse gas emissions are sequestered by an adjacent rainforest, built specifically for this purpose. Cal State Northridge also has one of the largest solar electric systems of any public university in California. Three solar installations feed into a power grid that distributes electricity throughout the campus.

The university also values sustainability related to building design and construction. Our new Valley Performing Arts Center has earned LEED Gold Certification due to many innovative design elements, including a state-of-the art HVAC system, reflective “cool roof” technology, and energy saving and water conservation systems.

CSUN has a record of research and development partnerships between its academic colleges and physical plant management, which include the design and installation of its sustainable energy facilities. In 2008, the university furthered its commitment to sustainability by chartering the Institute for Sustainability, which undertakes campus greening initiatives, promotes sustainability research, develops student education in sustainability, and puts best practices into action.

We are pleased to be a host of this important conference. I wish you a productive AASHE meeting and hope you enjoy your visit to our campus.

On behalf of the students, staff and faculty of UCLA, I am delighted to welcome you to Los Angeles for the Association for the Advancement of Sustainability in Higher Education 2012 Conference.

Our region is a leading green economy, and clean technology is a major driver of the growth strategy for 21st century Los Angeles. We at UCLA are proud to play an important role in the city’s sustainable future. For example, we are a founding partner and driving force behind CleanTech Los Angeles, a consortium that brings businesses and government together with our city’s world-class universities to foster investment in green business and harness our wealth of intellectual capital around sustainability.

At the same time, as the University of California’s largest campus, we recognize that UCLA can make a tremendous impact by reducing our own carbon footprint. During the past two decades, we have added nearly 8 million square feet to campus; in that span our greenhouse gas emissions have been nearly flat—a reduction in GHG of 27 percent per square foot. UCLA is ahead of schedule in our objective of meeting the UC goal of reducing greenhouse gas emissions to 1990 levels by 2020; we have already achieved UC’s target of 75 percent waste diversion, and we are on our way to zero waste by 2020.

A key element in these accomplishments has been our remarkable 4.4 megawatt cogeneration plant, which uses waste heat from electricity generation to produce steam and chilled water for heating and cooling, and is twice as efficient as a standard power plant. This impressive facility will be just one highlight of a campus tour during the conference—another is our newly opened Court of Sciences Student Center, certified LEED Gold by the U.S. Green Building Council—and I hope you will make UCLA a part of your AASHE itinerary.

Given the diversity of environments in and around Los Angeles, our city is an ideal living laboratory for sustainability research. So it’s no wonder that students and faculty from throughout campus are engaged in climate change policy and sustainability science. At the epicenter of this work is our renowned Institute of the Environment and Sustainability, which houses seven research centers and coordinates research among the many other UCLA units that are undertaking environment and sustainability scholarship.

Thank you for your commitment to fostering sustainability research and sustainable practices in higher education and congratulations on your participation in AASHE 2012. I wish you a successful conference and an enjoyable visit to Los Angeles.

"Cal State Northridge—the academic and economic leader of the San Fernando Valley—has a long history of investment in sustainable infrastructure and practices."

"Our region is a leading green economy, and clean technology is a major driver of the growth strategy for 21st century Los Angeles."
The University of California, Riverside, welcomes the AASHE Conference and is delighted to help sponsor an organization that promotes the kind of work that our researchers began in the 1960s.

Twenty years before Rachel Carson helped kick-start the environmental movement with “Silent Spring,” Riverside faculty and scientists have spent the intervening 60 years examining the complex chemistry of air pollution and smog, and their effect on plant and human life, resulting in higher-yield crops, healthier forests, cleaner vehicles and improved public health.

The fledgling UC Riverside campus created the statewide Air Pollution Research Center in 1961 and 20 years later incorporated engineers into the mix. The UCR College of Engineering Center for Environmental Research has helped formulate more than a dozen state and federal regulations, from boat emissions to diesel fuel. Now, a new generation of UCR scientists is incorporating global climate change and public health studies into their research through the Centers for Sustainable Suburban Development, for Water resources and the School of Public Policy.

Students and administration work together to bring a whole system approach to campus sustainability. A self-imposed student fee will pay for solar panels for their student union building. UCR certified its first LEED gold lab, installed a one MW battery to reduce peak energy demand, and drives alternative fuel vehicles. And I am promoting the institutionalization of campus sustainability through the American College and University Presidents’ Climate Commitment.

We know sustainability matters. We know research and education work. We are here to learn and we hope you will join us.
AASHE UPDATES

RESOURCE CENTER
One of the most popular benefits of AASHE membership, the Resource Center continued to be a leading source of information on sustainability in higher education for diverse stakeholders. Throughout 2011 AASHE resources provided campus administrators, faculty, staff and students, and the businesses that serve them, with timely and essential tools to lead the sustainability transformation.

After a re-design in early 2011, the Resource Center experienced a significant jump in visitors compared to 2010 — a 60% increase in unique page views, and a 24% increase in total page views - a sign that people were increasingly engaging with our resources.

PUBLICATIONS

In 2011 AASHE debuted its first e-book for sale. The 2010 Campus Sustainability Review, was offered on the Kindle e-reader and also made available free to members in PDF format.

AASHE also released the results of the 2010 Higher Education Sustainability Staffing Survey in 2011. It showed that those with positions in the higher education sustainability workforce report a strong sense of job security and feel satisfied with the work they are doing, and revealed the continued growth of sustainability staff positions.

The number of subscribers to the weekly AASHE Bulletin grew from 10,723 to 11,000 in 2011, and 50 issues were published. The newsletter continued to garner above-industry average open and click-through rates per issue. It also continued to drive traffic to our website, including our blog and discussion forums. Website traffic typically increased by 15% on days the Bulletin was published.

We want know what you think about AASHE publications. The AASHE Resource Center staff are available at the AASHE exhibit booth during EXPO hours.

CURRICULUM

AASHE hired an Education Manager in April 2011, to address education for sustainability efforts and develop coherent professional development opportunities. An Education Steering Committee, was created to guide the development of AASHE’s educational programs and ensure that member needs were met.

AASHE continued to offer our popular Sustainability Across the Curriculum Leadership Workshops. More than 74 faculty members from 54 institutions left these workshops prepared to advance education for sustainability at their campus by working with other faculty in fostering curriculum change.

At the AASHE 2011 conference, 120 educators participated in the Curriculum Convocation, an interactive workshop that provided strategies for integrating sustainability across the curriculum.

Development of a new, interactive section of the AASHE website, tentatively called the “Academic Commons,” was initiated in 2011. The intent is to provide a place for faculty to explore critical questions and issues online, advancing the integration of sustainability into curricula. Best practices and innovative examples of sustainability education would be able to come alive through case study videos and interviews.

MEMBERSHIP

AASHE membership grew by 1.4% in 2011, from 1,089 members and associate members at the start of the year to 1,103 by the end. The number of campus members grew by 2.3%, reaching 858 at year’s end. Renewal rates for campus members were 87% throughout the year, while businesses renewed at about the 70% rate and other associate members (such as non-profits) at 81%. The positive growth during a tough economic climate in 2011 demonstrates the strong commitment by AASHE members to continued advancement of sustainability in higher education.

The invaluable resources provided by AASHE, as well as the many networking and professional development opportunities continued to bring value to our members. Through webinars, workshops, and the annual conference, AASHE provided opportunities for individuals to interact with a diverse and engaged community. With our wide array of member-only and public resources, AASHE continued to be at the forefront in leading the sustainability transformation and supporting the great work and accomplishments of our members.

The Membership staff organized a series of educational webinars in 2011 sponsored by higher level business members as part of the Business Alliance Program. These well-attended webinars covered such diverse topics as large-scale campus solar projects, sustainable design strategies, and bed bugs and chemicals of concern in dorms.

The Sustainability Tracking, Assessment & Rating System (STARS) is a transparent, self-reporting framework for colleges and universities to measure their sustainability performance. STARS was developed by AASHE with broad participation from the higher education community.

STARS is designed to:
- Provide a framework for understanding sustainability in all sectors of higher education.
- Enable meaningful comparisons over time and across institutions using a common set of measurements developed with broad participation from the campus sustainability community.
- Create incentives for continual improvement toward sustainability.
- Facilitate information sharing about higher education sustainability practices and performance.
- Build a stronger, more diverse campus sustainability community.

The STARS framework is intended to engage and recognize the full spectrum of colleges and universities in the United States and Canada — from community colleges to research universities, and from institutions just starting their sustainability programs to long-time campus sustainability leaders. STARS encompasses long-term sustainability goals for already high-achieving institutions as well as entry points of recognition for institutions that are taking first steps toward sustainability. International institutions seeking participation in STARS are encouraged to register for the STARS International Pilot Program through the STARS website.

Businesses can also be involved with the STARS Program. STARS sponsorship provides an outstanding opportunity for companies to demonstrate their support of campus sustainability and to increase their visibility among campus decision-makers who are engaged in sustainability.

Visit the STARS website, www.stars.aashe.org, for all of the details regarding sponsorship, including sponsorship levels and benefits, which include:
- Listing in the STARS Quarterly Review
- Opportunity to participate in STARS webinars
- Acknowledgement on the STARS website
- Logo recognition in STARS publications
- And more!

AASHE offers a variety of STARS resources including webinars and the monthly STARS e-newsletter. To register for STARS and access these valuable resources visit the STARS website, www.stars.aashe.org.

**LIMITED-TIME STARS DISCOUNT OPPORTUNITY**

Register for STARS at the AASHE 2012 Conference and receive a discount! Any institution that is a new registrant to the STARS Program between October 10 – 21, 2012 will receive a $250 discount registration for AASHE members is $650 (a discount from the original fee of $900) and $1,150 for Non-members (a discount from the original fee of $1,400).

**Innovation in Higher Education: Leading the Change**

The diverse crises that the planet faces will only be solved when companies and communities implement authentic and innovative sustainability practices. Institutions of higher education have the lead role to play in creating the next generation of thought leaders our world needs. They will either succeed in this or become increasingly irrelevant.

It is therefore encouraging that there are an increasing number of colleges and universities now including sustainability as part of their campus management programs, curriculum, and offerings.

I am a professor of a field that did not exist when I went to school. In this young field most of the thought leaders are still among us, and are making it up as we go forward, this may challenge academic traditionalist but it excites students. Unleashing this creativity will create the future for higher education.

**L. HUNTER LOVINS** is president and founder of the Natural Capitalism Solutions (NCS) (www.natcapsolutions.org). NCS educates senior decision-makers in business, government and civil society to restore and enhance the natural and human capital while increasing prosperity and quality of life. In partnership with leading thinkers and implementers, NCS creates innovative, practical tools and strategies to enable companies, communities, and countries to become more sustainable. Trained as a sociologist and lawyer (JD), Hunter is also currently faculty at Bainbridge Graduate Institute and the chief insurgent of the madrone project.

Lovins has consulted for scores of industries and governments worldwide. She has consulted with large and small companies including the International Finance Corporation, Royal Dutch Shell, Interface, Clif Bar, and Wal-Mart.

Governmental clients include the Pentagon, U.S. Environmental Protection Agency, Department of Energy and other agencies, numerous cities, and the governments of Jamaica, Australia, and the U.S. She has also served an advisor to the Energy Minister of the Government of Afghanistan. Recipient of such honors as the Right Livelihood Award, Lindbergh Mini-Prize, and a “Green Business Icon.”

Lovins has coauthored nine books and hundreds of papers, including the 1999 book, Natural Capitalism, 2006 e-book Climate Retention Manual for Cities, and the 2009 Transforming Industry in Asia. She has served on the boards of governments, non- and for profit companies. Hunter’s areas of expertise include Natural Capitalism, sustainable development, globalization, energy and resource policy, economic development, climate change, land management, and fire rescue and emergency medicine. She developed the Economic Renewal Project and helped write many of its manuals on sustainable community economic development. She was a founding Professor of Business at Presidio Graduate School, one of the first accredited programs offering an MBA in Sustainable Management, and is currently Chief Insurgent for the madrone project.

**THE CROSSROADS PROJECT | KEYNOTE**

**Monday, October 15**

**At the dawn of the 21st century, humanity has arrived at an extraordinary Crossroads — a time and place where scientific ability to identify unprecedented risk, decades in advance, intersects society’s seeming inability to respond. Little of humanity’s course, as currently imagined, is sustainable—not our energy, not our economy, not our environment. But we are possessed of the knowledge we need, and a tide is rising. The Crossroads Project is a response to this reality, grounded in science, elevated by art, in service of genuine understanding.**

**ROBERT DAVIES**

A physicist and educator, and Assistant Director for Assessment and Technology at University of Utah, Rob has served as an officer and meteorologist in the U.S. Air Force, worked for NASA on the International Space Station project, and taught on the faculty of three universities. His scientific research includes interactions of spacecraft with the space environment, the fundamental nature of light and information, and Earth’s changing climate. For the past six years, Rob’s work has focused on communicating the science of climate change, energy and sustainability.

**ROBERT WATERS, Violin**

A violinist of remarkable versatility, Robert Waters studied at the Cleveland Institute of Music, the Yale School of Music, and the Juilliard School. His range of experience includes positions such as Concertmaster of Chicago’s Music of the Baroque, founding member of the Jupiter Trio and the Calisto Ensemble, Associate Concertmaster of the San Francisco Opera Orchestra and Associate Professor of Violin at the DePaul University School of Music. In his current position with the Fry Street Quartet, Robert is on the faculty at USU’s Caine College of the Arts.

**REBECCA MCAFUL, Violin**

Rebecca is a founding member of the Fry Street Quartet, and teaches on the faculty of Utah State University’s Caine College of the Arts. She is a graduate of the Oberlin Conservatory and Northwestern University. As a teenager, Rebecca spent an inspiring summer at the Tanglewood Institute in the presence of great artists such as Leonard Bernstein and Yo Yo Ma, after which she began to realize a life in music became imperative. It was the medium of the string quartet, with its fantastic literature, range of expression, and ability to connect with an audience that called; the Fry Street Quartet has been and continues to be the realization of that pursuit.

**BRADLEY OTTENES, Violin**

Bradley teaches in the Caine College of the Arts at Utah State University. He holds a master’s degree from the New England Conservatory and a bachelor’s from Northwestern University. The different phases of his early career were rich and varied — he has been based in Boston, Massachusetts and Calgary, Alberta. He has taught at every level — from public school to university, and values his experience of performing alongside doctors and lawyers equally with being the tenured member of a symphony orchestra.

**MARC JOHNSON, Guest Cellist**

At the age of eighteen Marc became the youngest member of the Rochester Philharmonic Orchestra and has also been a member of the Pittsburgh Symphony Orchestra. For thirty-five years, Marc performed as the cellist of the renowned Vermeer Quartet. They received three Grammy nominations and appeared regularly at the world’s great music festivals. Marc has held residency positions with Northern Illinois University, Bay Chamber Concerts in Rockport, Maine, and The Royal Northern College of Music in Manchester, England. Marc is Adjunct Professor of Music at Boston University College of Fine Arts.

TONY CORTESE

Leonardo da Vinci to Higher Education: Lead us on a Healthy, Just and Sustainable Path Now

ANTHONY D. CORTESE, SCD is a Senior Fellow of Second Nature, the Boston-based advocacy organization committed to promoting sustainability through higher education. He was its co-founder along with U.S. Senator John Kerry (D-MA), Teresa Heinz Kerry and Bruce Drost. He served as president from March 1993-August 2012.

He was the organizer of the American College & University Presidents Climate Commitment and co-founder of the Association for the Advancement of Sustainability in Higher Education and the Higher Education Association Sustainability Consortium.

Dr. Cortese was formerly the Commissioner of the Massachusetts Department of Environmental Protection. He was the first Dean of Environmental Programs at Tufts University and founded the award-winning Tufts Environmental Literacy Institute in 1989 that helped integrate environmental and sustainability perspectives in over 175 courses. He also organized the effort that resulted in the internationally acclaimed Talloires Declaration of University Leaders for a Sustainable Future in 1990 now signed by over 350 presidents and chancellors in over 50 countries.

Dr. Cortese is a trustee of Tufts University and Green Mountain College and a Fellow of the American Association for the Advancement of Science. He has been actively engaged in dealing with large system sustainability challenges for 40 years.

MAHESH PRADHAN

GUPES: The Global Universities Partnership on Environment for Sustainability

MR. MAHESH PRADHAN, was appointed as Chief of UNEP’s Environmental Education and Training Unit (EETU) within the Division of Environmental Policy Implementation (DEPI).

EETU assists with the implementation of UNEP’s mission: To provide leadership and encourage partnership in caring for the environment by inspiring, informing, and enabling nations and peoples to improve their quality of life without compromising that of future generations.

The core focus at EETU is UNEP’s enhanced engagement with Universities. This is clustered around three key pillars of education, training and networking. Drawing upon the successful Mainstreaming Environment and Sustainability into African Universities (MESA) initiative, EETU has initiated a Global Universities Partnership on Environment and Sustainability (GUPES), which was launched as a lead up to the Rio+20 Conference and the Higher Education Sustainability Initiative (HESI). EETU seeks to promote enhanced student engagement on priority and emerging sustainability issues, with focus on students at undergraduate and graduate levels.

MONTY HEMPEL

Sustainability: Changing the Operating System Documentary World Premiere

MONTY HEMPEL is a documentary filmmaker and environmental scientist. He is currently the Hedco Professor of Environmental Studies and Director of the Center for Environmental Studies at the University of Redlands, in Southern California. He is also president of Blue Planet United, a small educational organization that produces environmental films and publishes a quarterly news journal about human population, consumption, and sustainability www.blueplanetunited.org.

Hempe’s teaching, research, film, and public service interests focus on environmental science and politics, sustainability concepts, climate disruption, marine environmental protection, and wilderness preservation. His professional work is strongly interdisciplinary and guided by the goal of pragmatic idealism.

He is a past president of the Association for Environmental Studies and Sciences (AESS) and was a founding board member of the Association for the Advancement of Sustainability in Higher Education (AASHE). In addition, he has served on the executive committee of the national Council of Environmental Deans and Directors (CEDD), and currently serves as a Senior Fellow of the InterEnvironment Institute and California Institute of Public Affairs, and as an appointed member of the Southern California Association of Governments (SCAG) Benchmark Task Force.

JORDANA DEZEEUW SPENCER

Partnering Social Justice with Sustainability: A Challenge to Expand Our Understanding of Inclusivity

JORDANA DEZEEUW SPENCER, Ph.D. has taught in both public and private schools, nationally and internationally, ranging from Massachusetts to California and South Africa to Greece. In addition to her classroom experience, Jordana has facilitated eight seasons of programs with Interlocken: Center for Experiential Learning (through which she has worked with students across Western Europe, Northern Africa, and the Hawaiian Islands). Jordana’s scholarship draws upon Critical Social Theory & Pedagogy, Feminist Theory & Pedagogy, an Ethic of Care, Dialogism & Communication Theory, and Intersectionality Theory to explore what capacities the human animal needs to nurture in order to connect in solidarity across “difference” (whatever we may perceive that to be).

Jordana’s passions lie in Social Justice Education with particular foci on Gender & Sexuality, as well as Anti-Racism Studies and solution-oriented critiques of culturally constructed oppressive systems. Jordana complements her Graduate Faculty responsibilities at Prescott College with teaching in their undergraduate program and advising in their Sustainability Education doctoral program, while continuing her international work during the summer.
We turn plastic bottles into Graduation Gowns

- Made from post consumer plastic bottles
- 23 bottles in each gown
- GreenWeaver (matte finish)
- NuHorizon (satin finish)
- Softer and cooler than polyester
- Recyclable after commencement
- Rebate program funds other sustainability projects on campus
- Manufactured in Virginia
- 12 MILLION - the number of plastic bottles have been diverted from landfills to manufacture GreenWeaver gowns

Visit us at booth 419 to learn more.

Less than 30% of all plastic bottles in the USA are recycled.

Oak Hall is working to increase that number, but we need your help.

ARThUR E. FraZier III, AIA, Director of Facilities Management & Services, Spelman College
Arthur E. Frazier III, AIA is a licensed architect and the director of Facilities Management & Services at Spelman College. Under Art’s leadership the facilities department at Spelman has been nationally recognized as a leader in sustainability among historically Black colleges and received the President’s 2008 Award for Excellence in Customer Service. Art is co-chair of Sustainable Spelman and also serves first vice-president of GARPA, as chairman of the board of directors of the University Community Development Corp. and is on the board of advisors of Sustainable Atlanta.

SARAH E. JOHNSON is the coordinator of the Institute for Sustainability at California State University, Northridge. She holds a bachelor’s degree in Psychology from California State University, Long Beach and a master’s degree in Counseling with a specialization in College Counseling and Student Services from California State University, Northridge. She collaborates with faculty, administrators, and staff on campus sustainability projects and supervises student work on projects. She is passionate about integrating sustainability into all areas of higher education.

CASSIDY CANNON is the Sustainability Director at Elizabeth City State University. With this position she has the responsibility of building comprehensive plans, initiatives and programs for faculty, staff, and students that implement behavioral change and protect University resources. Prior to being hired, she received her degree at Elizabeth City State University in Business Administration with a concentration in marketing. While in school she founded the Community Relations Committee, an organization dedicated to community outreach through service and sustainability. Ms. Cannon expanded her environmentalism work by partnering with Green For All as a college ambassador and the United Negro College Fund-Building Green. Cassidy believes that all HBCU’s and MSI’s have a vested interest in the environmentalism work by partnering with Green For All as a college ambassador and the United Negro College Fund-Building Green. Cassidy believes that all HBCU’s and MSI’s have a vested interest in the sustainability world as it is the newest portal for university opportunity and student income.

VERNA FOWLER, of Menominee and Stockbridge-Munsee heritage, is an enrolled member of the Menominee Indian Tribe of Wisconsin. Dr. Fowler has taught at the elementary, secondary, and college levels and has administered schools at the elementary and college level since 1968. Dr. Fowler is the founding President of the College of Menominee Nation. She has served as the chief officer of the College since its founding in 1993. The reservation-based community college has campuses in Keshena and Green Bay, Wisconsin. Dr. Fowler is a past President of the American Indian College Fund Board (AICF), and served as Vice-President of the American Indian Higher Education Consortium (AIHEC). She was appointed by President Bill Clinton to the White House Initiative on Tribal Colleges and Universities and re-appointed to serve by President George Bush in November 2006.

PANEL MODERATOR FELICIA M. DAVIS, directs the UNCF Institute for Capacity Building Facilities and Infrastructure Enhancement Program where she oversees implementation of the Kresge Foundation funded Building Green Initiative for Minority Serving Institutions. Davis works to green Black, Hispanic-serving, and Tribal colleges and universities with a goal of reducing institutional carbon footprints and moving aggressively toward carbon neutral campuses. An author of the critical Air of Injustice Report, she brought together the Georgia Coalition for the Peoples’ Agenda, Black Leadership Forum, Clean Air Task Force and the Clear the Air Campaign in an historic collaboration.

GREENING of the CONFERENCE

- Working with NextEra as a dedicated Carbon Offset Sponsor to create a partnership focusing on mitigating emissions created from attendee and vendor travel and event center usage.
- Working with the LACC to ensure waste diversion through onsite composting and single stream recycling efforts.
- Partnering with local hotels who offer sustainability highlights including onsite recycling and rewards programs for those who chose to skip laundering services.
- Attendees have been active in pledging to bring their own coffee mug, water container, pens and paper, and re-sourced event lanyard so as not to create event related material waste.
- Utilizing EPEAT Gold Standard computers in all concurrent and general sessions.
- Offering FloWater stations throughout the conference and eliminating the use of plastic/disposable bottled water.
- Controlling room temperatures and energy output from light sources in conjunction with the Convention Center and AV company partnerships.
- Partnering with Scotson, a General Service Contractor for the Exhibit Hall, whose business plan focuses on sustainability measures from supply chains to onsite material usage.
- From energy use reductions, water conservation, waste reduction (compostable paper products, recycling, food donation), green certified cleaning products, local foods, free trade coffee, water stations vs. water bottles, and bulk condiments; these are just a few of the ways AASHE continues to fulfill the mission of your organization.

Creating Sustainability through ART

In September 2010, thirty-three academic leaders from 33 independent colleges of Art and Design came together to create a new vision for design education that responds to the complex nature of our world. Each PALS “Fellow” has been appointed by the president of their institution to participate in a collaborative effort to link the resources of independent art and design colleges around the ethical, environmental, social, and human centered design issues that face us.

Together we are responding the the question, “How do we ensure that our students are prepared to create a healthy, just and sustainable future?” The PALS-AASHE exhibition “Creating Sustainability” represents the work of student artists and designers from 12 of the PALS member schools. The projects are based around five key themes: water, energy, materials, social equity and health.

Participating schools
- Art Center College of Design
- California College of Arts
- California Institute of the Art
- Emily Carr University of Art Edesign
- Pacific Northwest College of Art
- Pratt Institute
- Parsons New School of Design
- Otis College of Art and Design
- Ontario College of Art and Design
- Rhode Island School of Design
- San Francisco Art Institute
- School of the Art Institute of Chicago

A Major Voice in the Sustainability Community

Key Benefits
- Provides the information and resources to foster collaboration among those who have the mandate to advance the preservation and sustainability of global resources
- Presents profiles of leaders in the field and effective academic and corporate sustainability programs that can be replicated
- Offers detailed coverage of sustainability issues, in-depth analysis of new approaches and partnerships, and professional tools

The Experts Say
“Sustainability reflects the need for an unprecedented and urgent transformation of our behavior and our economy to protect future generations from environmental and social catastrophes. The Journal of Record promises to offer the range of perspectives needed to show leaders in all fields how we must work together to create these kinds of changes.”

NOTES
2012 ACKNOWLEDGEMENTS

THANK YOU ABSTRACT REVIEWERS!

Over 600 abstracts were received for AASHE 2012, and almost 170 individuals volunteered their time, energy and expertise to review these submissions. Without their help, this conference would not be possible! Thank you to all of our reviewers for helping to create the AASHE conference program!
